

COMPLIANCE COMPONENT

Last Updated: 8-3-05

DEFINITION															
<i>Name</i>	Race Code Table														
<i>Description</i>	This document contains the basis for the creation of a race data code table standard for the classification of people based upon ancestry and/or national-origin. Currently, the Census Bureau and others consider race to be a socio-political construct, not a scientific or anthropological one. Race categories include national origin groups as well.														
<i>Rationale</i>	Provides a set of guidelines in which race elements can be uniformly defined, coded and maintained thereby allowing integration and interaction between state systems within Missouri. The code table does NOT address all ancestry issues or types. Ancestry refers to a person's ethnic origin or descent, "roots," heritage, or the place of birth of the person, the person's parents, or their ancestors before their arrival in the United States. Some ethnic identities, such as Egyptian or Polish, can be traced to geographic areas outside the United States, while other ethnicities such as Cajun evolved in the United States.														
<i>Benefits</i>	<ul style="list-style-type: none"> Provides a standard for classifying and coding race data within the state of Missouri Eliminates numerous variations each state agency may use when defining race data

COMPLIANCE DETAIL															
<i>State the Guideline, Standard or Legislation</i>	<p>State agencies shall use the following minimum categories and associated values for the race descriptions and codes:</p> <table> <thead> <tr> <th><u>Race Code</u></th><th><u>Race Description</u></th></tr> </thead> <tbody> <tr> <td>100</td><td>White</td></tr> <tr> <td>200</td><td>Black or African American</td></tr> <tr> <td>300</td><td>American Indian/Alaska Native</td></tr> <tr> <td>500</td><td>Asian</td></tr> <tr> <td>600</td><td>Native Hawaiian/Pacific Islndr</td></tr> <tr> <td>700</td><td>Other Single Race</td></tr> </tbody> </table> <p>For the related element definition standards see Compliance Component Race and Ethnicity Element Standard.</p>	<u>Race Code</u>	<u>Race Description</u>	100	White	200	Black or African American	300	American Indian/Alaska Native	500	Asian	600	Native Hawaiian/Pacific Islndr	700	Other Single Race
<u>Race Code</u>	<u>Race Description</u>														
100	White														
200	Black or African American														
300	American Indian/Alaska Native														
500	Asian														
600	Native Hawaiian/Pacific Islndr														
700	Other Single Race														

	<p>If business requirements for null value specifications are to isolate the difference between a legitimate null value and a missing value, then a separate column should be defined utilizing the codes (NullCode) defined in the Compliance Component Data Element Definition Standard to add characterizations for the data when it is defined as null.</p> <p>In the collection of information, the revised standards require, among other things, that agencies offer individuals the opportunity to select one or more races when reporting information on race in data collections.</p> <p>In relating to Census data the first digit of the code is comparable across years (1850-2000), with the exception of the residual "other" category, which contains any race not listed explicitly in the available data in a given year.</p> <p>Full ancestry, race, and hispanic coding schemas are available from the Census Bureau if the business requirements of the agency require it. These can be found at: http://www.census.gov/population/www/cen2000/SF4-race.html#5</p>		
<i>Document Source Reference #</i>	<p>OMB Bulletin No. 00-02: <u>Guidance on Aggregation and Allocation of Data on Race for Use in Civil Rights Monitoring and Enforcement</u> This Bulletin also provides guidance on how agencies can allocate multiple-race responses for use in civil rights monitoring and enforcement.</p>
